Application No.: 09/852,799

Amendment dated: December 26, 2006

Reply to Office Action of: August 25, 2006

Listing of Claims:

1-13 (Cancelled)

14 (Previously presented) A computer-readable medium having a data structure thereon, said data structure being read and processed by a computer, said data structure

relating to storing handwritten ink information, said data structure comprising:

a first portion having a tag representing an identification of a type of tag data;

a second portion identifying a size of said tag data;

a third portion having a table, said table including global unique identifiers:

a fourth portion having the tag data, the tag data including an identifier means for

referencing a global unique identifier in the table associated with a property of the handwritten

ink information.

wherein the property of the handwritten ink information associated with the global unique identifier in the table is applied to the tag data based on the referencing.

15. (Original) The computer readable medium according to claim 14, wherein

tags for said global unique identifiers are determined by the position of said global unique

identifiers in said table.

16. (Original) The computer readable medium according to claim 14, wherein

tags for said global unique identifiers are specified.

17 (Previously presented) The computer readable medium of claim 14

wherein the data structure further comprises a fifth portion describing an ink space rectangle.

18. (Previously presented) The computer readable medium of claim 14

wherein the data structure further comprises

a fifth portion having a first table, said first table describing metrics of properties.

Amendment dated: December 26, 2006 Reply to Office Action of: August 25, 2006

19. (Previously presented) The computer readable medium according to claim

18, further comprising:

a sixth portion comprising a second table, said second table describing properties of

strokes in which said properties are related to the metrics of properties in said fifth portion.

20. (Previously presented) The computer readable medium of claim 14

wherein said data structure further comprises a fifth portion having a transform table, said

transform table describing a transform for at least one ink stroke.

21. (Previously presented) The computer readable medium of claim 14

wherein the data structure further comprises a fifth portion having an attribute table, said

attribute table describing a drawing attribute for at least one ink stroke.

22-26. (Cancelled)
